Announcement

Medical Informatics Update 2008

Pfizer and the Center for Advanced Information Management at Columbia University will again jointly sponsor a Medical Informatics Update for regional health informatics specialists. The first Update, held in July 2007, was well received with attendees requesting follow-up sessions. The goal, once again, is a practical forum to report and exchange ideas on the latest developments, problems, solutions, issues, etc. in an important arena of information technology.

The program consists of invited talks covering various aspects of healthcare/medical/biomedical informatics with clinical, industrial, academic, and public health themes. Presentations will be short and will allow for ample discussion.

Speakers include George Hripcsak and Soumitra Sengupta (Biomedical Informatics, Columbia); Farzad Mostashari (NYC Department of Health and Mental Hygiene); Paul Conocenti (NYU Langone Medical); Louis Cornacchia (Doctations); Daijin Kim, Jim Tosone, and Angelo DelPirigi (Pfizer); Donald Rucker (Siemens Medical Solutions); Peter Elkins (Mount Sinai Center for Biomedical Informatics); and William Schroth (Hudson Highland Advisors).

For more details, go to www.cat.columbia.edu/documents/update2008.pdf

Registration

To register, send an email message to Laura.Tejada@dbmi.columbia.edu. There is no registration fee, but space is very limited and registrants are requested to honor their acceptance. Lunch and break refreshments will be provided by Pfizer.

When/Where

The Update is scheduled for 9:00 AM to 4:00 PM on December 10, 2008 at Pfizer Headquarters, 219 E 42nd St, Fourth Floor, Times Square Conference Room.

The Center for Advanced Information Management at Columbia University is
A NYSTAR-sponsored Center for Advanced Technology
